

Bend 67° 30' for gutter down pipes ø 63 **CUPRAELITE**

CUPRAELITE

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLR67063	copper effect	63	63,5	48	42	3	3	117	70	131	98

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 67° 30' for gutter down pipes ø 80 **CUPRAELITE**

CUPRAELITE

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLR67080	copper effect	80	80,6	50	44	2,1	2,2	146	85	146	94

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 67° 30' for gutter down pipes ø 80 **STEEL**

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLAC67080	steel effect	80	80,6	50	44	2,1	2,2	146	85	146	94

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 67° 30' for gutter down pipes ø 80

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLRA67080	antique copper effect	80	80,6	50	44	2,1	2,2	146	85	146	94

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 67° 30' for gutter down pipes ø 100 **CUPRAELITE**

CUPRAELITE

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLR67100	copper effect	100	100,6	60	54	2,2	2,1	183	106	181	160

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 67° 30' for gutter down pipes ø 100 **STEEL**

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLAC67100	steel effect	100	100,6	60	54	2,2	2,1	183	106	181	160
