

Non return valves to bond

NRC200A

| Item | Colour | A mm | C mm | length mm | D1 (M) mm | D2 (F) mm |
|---------|--------|------|------|-----------|-----------|-----------|
| NRC200A | red | 423 | 283 | 216 | 200,0 | 200,8 |
| NRC200G | grey | 423 | 283 | 216 | 200,0 | 200,8 |

Material: PVC-U

Features: Valves to glue are anti-flooding devices that close automatically when there is a backflow from the sewer system and allow normal discharge when reflux ceases. Installation is possible in gravity-operated wastewater drainage systems, inside and outside buildings for residential, commercial and industrial use.

The valves are all CE marked as they comply with the EN13564-1 standard.

- Non-return valve type 0
- Removable cover for inspection and maintenance
- Replaceable sealing plate (code PAV175N)
