

Non return valves with O-Ring

NRO200G

Item	Colour	A mm	C mm	length mm	D1 (M) mm	D2 (F) mm
NRO200A	red	423	283	216	200,0	200,8
NRO200G	grey	423	283	216	200,0	200,8

Material: PVC-U

Features: Valves with O-ring gasket are anti-flooding devices that close automatically when there is a backflow from the sewer system and allow normal discharge when reflux ceases. Installation is possible in gravity-operated wastewater drainage systems, inside and outside buildings for residential, commercial and industrial use.

The valves are all CE marked as they comply with the EN13564-1 standard.

- Non-return valve type 0
- Equipped with rubber sealing ring inside the
- Removable cover for inspection and maintenance
- Replaceable sealing plate (code PAV175N)
