Material: Mineral filled reinforced polypropylene

Colour: Light grey

Features:

- The well boxes are used to collect rainwater from streets, squares, garages, cellars, underground rooms, or more generally wherever the collection of liquids is necessary.
- The predisposition for the connection of the pipes is on all 4 sides.
- The pre-fracture lines are easily breakable with a hammer and bit.
- In the PZN20 and PZN30 wells the female inlet diameters (D1/D2/D3/D4) are at a higher level than the male outlet diameters (D6/D7/D8/D9).
- In the PZ40 and PZ55 wells all the grafts are female and are located at the same level on all sides.
