

Bend 87° 30' for gutter down pipes ø 63 **CUPRAELITE**

CUPRAELITE

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLR87063	copper effect	63	63,5	56	38	3,2	2,3	121	68	124	104

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 87° 30' for gutter down pipes ø 80 **CUPRAELITE**

CUPRAELITE

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLR87080	copper effect	80	80,6	51	44	2,1	2,1	146	85	136	112

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 87° 30' for gutter down pipes ø 80 **STEEL**

STEEL

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLAC87080	steel effect	80	80,6	51	44	2,1	2,1	146	85	136	112

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 87° 30' for gutter down pipes ø 80

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLRA87080	antique copper effect	80	80,6	51	44	2,1	2,1	146	85	136	112

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 87° 30' for gutter down pipes ø 100 **CUPRAELITE**

CUPRAELITE

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLR87100	copper effect	100	100,6	64	54	2,1	2,2	170	105	169	162

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).

Bend 87° 30' for gutter down pipes ø 125 **CUPRAELITE**

CUPRAELITE

Item	Colour	D1 mm	D2 mm	L1 mm	L2 mm	S1 mm	S2 mm	L mm	D mm	H mm	Weight g
CLR87125	copper effect	125	125,7	64	55	3,0	3,2	199	133	198	356

Material: Technopolymers

Features: The bend is composed by a mix of various polymers that gives the external surface a metallic shine, resistance to UV rays and colour retention over time ($\Delta E < 5$ after 5000 hour xenotest exposure).
