

Anti-nest comb

Item	Colour	B mm	H mm	L mm
FP7	black	25	70	500
FP11	black	25	110	500
FP15	black	40	150	500

Material: PP

Features: The Comb, positioned between cover and gutter, avoids the access of birds or other animals that could build nests under the covers.
The Comb teeth are made of flexible plastic material (Polypropylene) in order to be adaptable to the available space.
The base of comb must be fixed (by screws or nails) to keep it in the desired position.
