

## Terminal pipe antishock ø 80 **DAUPHIN**

# DAUPHIN

Item	Colour	Length mm	Db mm	Dt mm	Sb mm	St mm	L1 mm	Annular rigidity kN/m <sup>2</sup>	Weight g/m
TJ8020N	black	2000	80,6	80	2,3	2,7	> 58	9	840
TJ8015N	black	1500	80,6	80	2,3	2,7	> 58	9	840

**Material:** PVC antishock

**Features:** The anti shock down pipe complies with the impact test at low temperatures according to the EN 607 standards.

**Impact resistance:** the pipe has an impact resistance greater than 160 J/cm<sup>2</sup>. This resistance is determined by means of a percussion test based on the UNI 9031 standard, where the pipe is hit by a steel punch with an impact surface of 0.4 cm<sup>2</sup> in free fall from a height of 1 m with a weight of 7 kg.

**Toughness and elasticity:** the pipe can be totally squashed without cracking, once the pressure stops the pipe recovers more than 50% of its original diameter.
